

How to Use the Video Clip:

1. Click play button to start the video.
2. To stop the video completely, click the “stop” button. If you click play again, the video will start from the beginning and not from the point where it was stopped.
3. In order to stop the video halfway through without starting all over again, click “pause.” This is the same button as “play.”
4. To go back to the previous screen without starting all over again, press “pause” then press the “rewind” button. This will roll the video backward. You can then press “play” again once you find the appropriate screen.
5. To fast forward, press “pause” then press the “forward” button. This will move forward. You can then press “play” again once you find the appropriate screen.
